Objective: Motivated Full Stack Developer and problem solver with a background in big data. Experience with analytical thinking, project management, strong team skills, and excellent verbal and written communication.

TECHNICAL SKILLS

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, AJAX, SASS.

Backend: MySQL, Express, ReactJS, Node, Handlebars, Firebase, AWS, Webpack, Gulp.

PROJECTS

Open-Source-Trivia | https://mighty-thicket-73561.herokuapp.com/login

This is an app where you can log on and chat with friends while you play a cool trivia game.

- In this project it uses a few different APIs, Socket.io, Sequelize, and Passport.js to create a full stack website.
- In progress of deploying the application.

Password Generator | https://github.com/asedlackcode/homework3

- This is an app that generates a password at the click of a button.
- In this project it uses filters to decide what kind of password you would like.
- For this project I used basic HTML, CSS, and Jquery.

Weather App | https://github.com/asedlackcode/weatherapp

- The Weather app gives you the weather and 5-day forecast of the city of your choice.
- In this project I had to use a third-party API to obtain the information about the weather.
- To achieve this I used HTML, Bootstrap, and Jquery.

Daily Planner | https://github.com/asedlackcode/dailyplanner

- This Daily Planner is used to make planning the day easy and simple.
- This project implements local storage in order to save the data that you insert into the planner.
- For this project I used HTML, CSS, and Jquery.

EDUCATION

University of Riverside, Extension   Expected completion July 2020
 Web Development Certification

Riverside Community College   Expected Graduation May 2022
Associates of Art in Computer Science
